3 Triad Center, Ste. 350  
Salt Lake City, UT 84180-1203

MAR 2 1994

Dear Mr. Hedberg:

Mr. Ronald Willden, acting for J.L. Carroll Mineral Exploration, submitted the attached Notice for work in T. 39 S., R. 18 W., sec. 23 and 26. It appears the work will be on existing roads, and should cause very minimal disturbance. Our file number for this operation is UTU-72243.

Pete Parsley of USMX has submitted an amendment to their exploration plan (E/053/012). He is proposing about 1000 feet of new road and 10 drill holes. The work site is in the area already cleared for mining, so no problems are foreseen.

The acceptance letter with conditions for the amendment to Mr. Steven DeLong's notice (E/053/039) is attached.

If you have any questions concerning our actions on these operations, please contact Larry Gore at this office.

Sincerely,

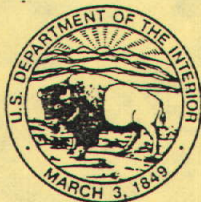

Debbie J. Pietrzak  
Area Manager

Certified Mail #P 347 587 199 - Return Receipt Requested

Mr. Steven DeLong  
P.O. Box 504  
Ivins, UT 84738-0504

Dear Mr. DeLong:

This will acknowledge receipt and acceptance of the February 1, 1994 amendment to your Notice for work in T. 39 S., R. 18 W., sec. 23 and 26 on the Rainbow unpatented claim. The amendment was incorporated into your Notice, and the case file is UTU-70057. The Conditions of Acceptance for this amendment are attached.

You are required to reclaim any of the existing road, which the proposed road bypasses.

A copy of the information provided in the amendment has been forwarded to the Utah Division of Oil, Gas, and Mining (UDOGM). Therefore, you will not be required to submit an application to UDOGM; however, reclamation of work done under this Notice is required within the specifications of the Utah Mined Land Reclamation Act.

If you wish to claim exemption from the mining claim rental fee, it is your responsibility to conduct operations that qualify under 43 Code of Federal Regulations (CFR) 3833.1-6. Failure to conduct qualifying operations or pay the rental fee may lead to the cancellation of the claims.

Acceptance of this Notice will not now, or in the future, serve as a determination of the validity of any mining claim to which it may relate.

When you submitted this amendment, you also discussed potential millsites on Grapevine Spring and Oak Patch Spring with Larry Gore. We have reviewed these sites and determined that additional information is needed before we make a determination. We need a site map showing how much surface disturbance is proposed, and how

the site will be laid out in relation to the springs, drainages, and existing roads. We also need to know how much water your project will require, and clarification as to the proposed disposition of the mill tailings.

If you have any questions, please contact Larry Gore of this office.

Sincerely,

Robert Douglas  
Acting Area Manager

Enclosure:

Conditions of Acceptance - 2 pages

## CONDITIONS OF ACCEPTANCE

Except for work to the extent necessary to preserve evidence of mineralization, and roads needed for the continuation of mineral-related exploratory operations, all work conducted under a mining Notice (43 CFR 3809.1-3) must be reclaimed prior to beginning any work under a new Notice of Intent.

All operations conducted under this Notice will be conducted in a manner that will prevent unnecessary or undue degradation and provide protection of nonmineral resources of the Federal lands.

Pre-work Meeting: An on site meeting of the Operator and a BLM representative will be conducted prior to any work being started.

Native Vegetation: Where possible, major vegetation (Pinyon and Juniper trees) will be avoided. All trees not otherwise needed for claim improvements will be stacked so they can be used during reclamation.

Road Specifications: The disturbance for the road will not exceed 20 feet and cut banks exceeding 3 feet are not authorized. Approval from the authorized officer must be obtained before exceeding these specifications. Water bar drainage dips may be required if erosion occurs on the road.

Drainages: The road will be constructed so that it will not cause any water impoundments. Culverts may not be installed without authorization.

Archaeological: No sites were identified in the specified work area. However, if any cultural and/or paleontological resource (historic or prehistoric site or object) discovered on public land shall be immediately reported to the Authorized Officer. All operations in the immediate area of such a discovery shall be suspended until written authorization to proceed is issued by the Authorized Officer.

Threatened or Endangered Species: If any species listed as threatened or endangered is encountered, the operator shall immediately suspend operations and report the incident to the Authorized Officer.

Refuse: The site shall be maintained in a sanitary condition at all times, and waste materials shall be disposed of promptly at an appropriate waste disposal site. "Waste" means all discarded matter including, but not limited to, human waste, trash, garbage, refuse, oil drums, petroleum products, ashes, and equipment.

Annual Update: If operations contained in this notice extend for more than one year, the Authorized Officer must be notified on the anniversary of your notice. This notification is required regardless of the time period stated in the Notice.

Reclamation: Reclamation will consist of:

Reshaping the drainage crossings so that no water is impounded and reshaping the drainages to natural configurations.

Pulling any berms or fill areas back into the road bed and reshaping the road to natural appearing contours.

Seeding with:

Common Name	Species	lbs/ac (PLS)
<u>Shrubs</u>		
Desert bitterbrush	Purshia glandulosa	1
Serviceberry	Amelanchier utahensis	1
Mountain mahogany	Cercocarpus montanus	1
Oakbrush sumac	Rhus trilobata	1
Forage kochia	Kochia prostrata	1
<u>Forbs</u>		
Yellow sweetclover	Melilotus officinalis	1
Lewis flax	Linum lewisii (Appar)	1
Palmer penstemon	Penstemon palmeri (Cedar)	1
<u>Grasses</u>		
Indian ricegrass	Oryzopsis hymenoides (Paloma)	2
Pubescent wheatgrass	Agropyron trichophorum	4
Smooth brome	Bromus inermis	2
Russian wildrye	Elymus junceus	2
Galleta grass	Hilaria jamesii	2

Revegetation will be acceptable when 35% ground cover of the desired species is obtained.

Notification of Reclamation: The Authorized Officer shall be notified when the required reclamation is completed. An inspection will then be made to determine the acceptability of the reclamation.
